## **DuraVent, Security Chimneys to Showcase Professional Venting Solutions at CMPX 2018**

**DETROIT, Mich., March 19, 2018** – With focus on the professional and commercial chimney and HVAC venting markets, DuraVent and Security Chimneys today announced it will showcase its industry-leading commercial venting products during CMPX 2018, March 21 – 23, 2018 at the Metro Toronto Convention Centre in Toronto, Ontario. DuraVent and Security Chimneys continues to expand its commercial product lineup with a variety of industrial-strength chimneys, all designed for Category I, II, III, and IV heating boilers, domestic water boilers, and low- to high-temperature hydronic heating applications.

Among the products on display will be Security Chimneys' Secure Seal®. The single- and double-wall system is designed for use with gas-fired appliances, high-efficiency gas boilers, furnaces, booster heaters, pool heaters, water heaters, unit heaters, or tankless water heaters. To guarantee a perfect fit every time and to avoid built-in stress points or weak areas, Secure Seal tube ends are formed under stringent guidelines and held to exacting standards.

Also being highlighted during CMPX 2018 is the DuraVent new-and-improved DuraStack® chimney system. The DuraStack Pro Series is designed to offer the ultimate in versatility for a variety of applications, including boiler breeching and stack, diesel exhaust, and grease duct applications. Certified for commercial chimney and diesel exhaust applications, DuraStack Pro is built with a strong, rigid assembly and significantly simplifies and accelerates installation.

"Our commitment to continual improvement is reflected in our growing commercial venting portfolio," said Don McInroy, national sales manager of Canadian commercial venting and OEM sales for DuraVent and Security Chimneys. "We are continuously raising the bar for quality, reliability, and ease of installation."

DuraVent and Security Chimneys also design and manufacture custom parts for companies requiring unique venting solutions for their equipment or system.

With more than 500 exhibitors, CMPX is a respected source of products, information, equipment and applications for industry professionals who want one-on-one access to the latest information and hands-on opportunities to come face-to-face with tomorrow's trends.

### **About DuraVent**

DuraVent® is a recognized technological leader in the venting industry. Consistently the first-to-market with new innovations in venting systems, DuraVent has captured a leadership position in emerging markets.

Scientifically proven materials and unequalled engineering make DuraVent products not only the best and safest choice, but the only choice for professional quality venting solutions. DuraVent is committed to continuing this trend by providing the industry with cutting-edge products and refinements to existing products that not only meet the demands of today's market but go beyond it.

### **About Security Chimneys**

For more than 50 years, Security Chimneys® has built a reputation as one of the most trusted suppliers of quality chimneys in North America. Our dedication to total quality lives in the research and development of new products and services for the residential and commercial markets.

Throughout our history, our product offerings have evolved. We've strengthened our focus on maintaining our leadership position in the industry by designing, building and marketing a complete line of chimneys for residential and commercial applications that have set the standard that other manufacturers have often imitated, but never equaled.
