

Secure Temp[®] ASHT

1" Insulated Stainless Steel, High-Temperature
Chimney

At Security Chimneys, we have been manufacturing chimney since 1960

That makes us one of the oldest manufacturers of venting products in North America.

The knowledge & experience gained over the years is reflected in the quality of the venting products we offer today. Secure Temp ASHT is a perfect example. This high-quality all-fuel chimney was introduced in 1978 and was quickly adopted by professional installers for use with factory-built fireplaces.

Since then, a number of enhancements have been made for use with freestanding stoves. Hearth professionals favour ASHT for its slim profile and smaller frame size; ideal for tight spaces. The lighter weight also makes it easy on the back; an important feature for installers who climb ladders every day.

Even better – unlike some competitors, when enclosed ASHT requires no continuous shields to meet Canada's ULC-S629 Standard.

Secure Temp ASHT Features & Benefits

All-Fuel Chimney | ASHT

FEATURES	BENEFITS
Proven engineered design with inner flue and outer casing both made of sturdy, high-quality, corrosion-resistant stainless steel	<ul style="list-style-type: none"> • Long, dependable service life means this will be the last chimney your home will ever need
Free-Floating stainless inner flue	<ul style="list-style-type: none"> • Flue is fixed only to male coupler on one end leaving it free to accommodate thermal expansion & contraction • Minimizes risk of metal fatigue and associated buckling / tearing that can occur with use; especially during chimney fires
Laser-Welded Inner and Outer Seams	<ul style="list-style-type: none"> • Enhances vertical strength • Eliminates potential source of leakage • Improves product quality & consistency
Twist-Lock Assembly with End Couplers	<ul style="list-style-type: none"> • Enables quick connection of pipe lengths in seconds with just a 1/8th turn • Eliminates need for awkward locking bands • Multi-point contact between couplers combined with generous overlap adds cross-sectional strength and reliable joint connection
One-inch wall thickness filled with exclusive Secura Plus insulation that will not shift or settle	<ul style="list-style-type: none"> • Insulation helps to keep the heat in and the cold out • Maintains higher flue-gas temperatures for fast start-ups and stable draft performance • Reduces condensation and related creosote deposits – the fuel that feeds a chimney fire • Eliminates risk of hot-spots
Slim, compact profile and lower weight yet still permits installation with as little as 2" clearance-to-combustibles	<ul style="list-style-type: none"> • Fits within a smaller frame and enclosure making it ideal for use in both renovation and new construction • ASHT is easy on the back - 6" diameter weighs in at just 5.2 lbs. per linear foot
No need for continuous shields when enclosed	<ul style="list-style-type: none"> • Eliminates cost of extra parts & labour • Simplifies installations
Heavy-Duty Ceiling Supports with Integrated Coupler & Flue Extension	<ul style="list-style-type: none"> • Factory-assembled as a single part to minimize air leakage around chimney • Reduces number of parts needed and simplifies installation
Wide variety of insulated components and vapor-barrier friendly designs to match today's high-efficient homes	<ul style="list-style-type: none"> • Keeps heating dollars in the home instead of being lost through walls & ceilings • Taller shields to suit deeper attic insulation levels • Ability to seal around chimney minimizes potential air leakage • Reduces risk of severe condensation in cold climates • Helps to prevent water damage within exterior walls and within ceiling / roof assemblies
Universal Support Hardware	<ul style="list-style-type: none"> • Roof Brace, Roof Support, Wall Support, and Wall Band all feature universal collar that can be sized to fit any diameter of ASHT pipe
Industry's BEST Limited Lifetime Warranty	<ul style="list-style-type: none"> • Unlike most others, our warranty is TRANSFERABLE to a future owner (competitor warranties are good only to the original purchaser) • Adds value for both the homeowner and prospective homeowner

Specifications

Applications

ASHT is a double-wall, all-fuel chimney system for use with wood stoves, wood fireplaces and other appliances using wood, oil, gas, or coal.

Materials and Construction

.016" 441 stainless steel inner wall.
.016" 430 stainless steel outer wall.
1" high-temperature mineral fiber insulation. Laser welded seam.

Clearances

2" clearance to combustibles

ASHT

ASHT is a double-wall, all-fuel chimney system for use with wood stoves, wood fireplaces and other appliances using wood, oil, gas, or coal. The use of stainless steel, selected for its resistance to high temperatures and corrosion, lends outstanding durability to the ASHT high-temperature chimney.

ASHT features 1" of high-temperature mineral fiber insulation. This insulation minimizes heat loss through the chimney walls and can withstand intense heat. The free-floating inner lining is attached only to the male coupler at the top, expanding and contracting freely with temperature fluctuations. The external casing carries the structural load. All ASHT pipe lengths, elbows, and other fittings feature fast and easy twist-lock assembly with just one-eighth turn. Even better, ASHT uses universal support hardware to speed up installation and to dramatically reduce the number of SKUs you need to keep in inventory.

Typical Installations

Single-Story Woodstove

Installation Key			
1	Vertical Cap	11	Floor Support
2	Storm Collar	12	Flue Extension
3	Adjustable Roof Flashing	13	Tee
4	Attic Radiation Shield	14	Wall Thimble
5	Firestop	15	Tee Cap
6	Length	16	Tee Support
7	Finishing Support	17	Anchor Plate (optional)
8	Wall Support	18	Reduced Clearance Support
9	Wall Radiation Shield		
10	Elbow		

- Refer to our Typical Venting Installation drawings to select the appropriate component parts for your installation.
- Always refer to installation instructions for complete information.

Multi-story Woodstove

Fireplace through exterior insulated chase

Exterior installation to a wood stove

For guidance in selecting stovepipe components, see our catalogs for Security's DL Double-Wall stovepipe.

Loadbearing Capacity

Please reference the chart below for each diameter's and supports load bearing capacity. Maximum height in feet.

Ø Interior	5"	6"	7"	8"	10"
Floor Support Plate	32	32	32	32	32
Reduced Clearance Support	--	60	50	45	--
Adjustable Tee Support	63	63	55	48	39
Roof Support	42	34	27	24	20
Wall Support	30	28	24	20	
Square Cathedral Support	--	60	50	45	35
Finishing Support	--	75	65	59	--

Size of Openings

The size of the opening may vary depending on the pitch of the roof.

Always maintain the minimum 2" clearances to the chimney. The only exception to this rule is with Reduced Clearance Supports (RCS). Consult our instructions.

Ø Interior	5"	6"	7"	8"	10"
Floor Support Plate	11 ^{3/8"}	12 ^{3/8"}	13 ^{3/8"}	14 ^{3/8"}	16 ^{3/8"}
Finishing Support	11 ^{3/8"}	12 ^{3/8"}	14 ^{3/8"}	14 ^{3/8"}	--
Roof Support	11 ^{3/8"}	12 ^{3/8"}	13 ^{3/8"}	14 ^{3/8"}	16 ^{3/8"}
Wall Thimble	11 ^{3/8"}	12 ^{3/8"}	13 ^{3/8"}	14 ^{3/8"}	16 ^{3/8"}
Firestop	11 ^{3/8"}	12 ^{3/8"}	13 ^{3/8"}	14 ^{3/8"}	16 ^{3/8"}
Cathedral Support	--	12 ^{3/8"}	14 ^{3/8"}	14 ^{3/8"}	--
Reduced Clearance Support	--	10 ^{1/8"}	11 ^{1/8"}	12 ^{1/8"}	--

General Specifications

7"	9"	1"	6.4 lb./ft.	YES	2"
8"	10"	1"	7.2 lb./ft.	YES	2"
10"	12"	1"	8.9 lb./ft.	YES	2"

Planning Your Installation

Figure 1

The following recommendations are a general guideline to assist in the layout and selection of the chimney components needed for your installation. Always follow ASHT Installation instructions when installing your chimney system (enclosed with any support). Installation instructions can be viewed online at www.securitychimneys.com.

- The diameter of the chimney should match the outlet size of the appliance. An improperly sized chimney results in poor draft and excessive creosote formation.
- Measure the diameter of the appliance flue outlet. Select the chimney connector stovepipe with the same size diameter as the appliance flue outlet.
- Determine if the installation is a through-the-roof installation or a through-the-wall installation. A through-the-wall installation will require additional components (Wall Thimble, Tee/Cap, Tee Support, Wall Bands, Flue Extension, and Decorative Collar).
- Install the chimney in the interior of the structure whenever possible. A cold exterior chimney will produce less draft and will generate more creosote.
- If possible avoid offsets that serve to restrict the natural draft. A straight vertical installation is more efficient and less likely to develop creosote. If an offset is required to avoid rafters or other obstructions, measure the horizontal distance required and the vertical height available. 15°, 30° and 45° elbows are available. (Note: 45° elbows are only allowed in Canada. The maximum angle allowed in the U.S. is 30°.) A maximum of two offsets (four elbows) in a single installation are permitted. At least one suitable support if required for each offset.
- Determine the minimum chimney height above the roof line. Building codes require a minimum of 3' above the roof penetration and at least 2' higher than any portion of a building within 10'. See Figure 1. The termination cap is installed above that point. If chimney is more than 5' above the roof penetration a Roof Brace is required.
- Measure the roof pitch. For example, a 6/12 pitch has a vertical rise of 6" over a horizontal distance of 12". Select the appropriate flashing.
- Determine the total length of chimney and stovepipe required for the installation. To calculate the installed length of 6"-8" ASHT chimney pipe, subtract 1 1/4" per joint. Subtract 1 7/8" of DL stovepipe. Minimum chimney height, at sea level, of straight vertical chimney, is 10' to 15' above the appliance outlet. Higher elevations, or the use of elbows or a tee, will require approximately 30% to 60% more height to provide for an adequate draft.
- Be fire safe. Maintain at least 2" clearance to combustibles. Follow local building codes and have your chimney inspected by a certified professional.

Wall Support Kit

Through-Wall Option #1: Kit includes: Insulated Wall Thimble, Tee, Twist-Lock Tee Cap, Wall Support, Wall Band, Flue Extension, Decorative Collars for DL stove pipe, and Vertical Cap. With this option, Tee can be positioned above or below Wall Support.

SIZE	6"
ORDER #	6WSK-2

Exterior Kit

Through-Wall Option #2: Kit includes: Insulated Wall Thimble, Tee, Twist-Lock Tee Cap, Tee Support with Coupler, Wall Band, Flue Extension, Decorative Collars for DL stove pipe, Vertical Cap, and Spark Arrester. With this option, Tee is positioned on top of Tee Support.

SIZE	6"
ORDER #	6EK-2

Interior Kit

Kit includes: Round Finishing Support with removable trim collar, Adjustable Attic Radiation Shield, and Vertical Cap.

SIZE	6"
ORDER #	6IKNC

Pipe Length

Available in sizes from 5 - to 10-inch diameters, the ASHT line offers double-wall, 1-inch insulated chimneys. Lengths twist-lock together with just an 1/8th rotation.

FOR USA ONLY: Available in Alu-Zinc outer casing for 6", 7", 8" (CODE GL)

Adjustable Pipe Length

Used in combination with straight insulated lengths, the adjustable length makes it possible to fit a length perfectly, either vertically, horizontally, or at an angle.

IMPORTANT: The adjustable length is not designed as a load bearing component. Its vertical installation requires an appropriate support on the section above it to bear the weight of the remaining installation.

FOR USA ONLY: Available in Alu-Zinc outer casing for 6", 7", 8" (CODE GL)

Insulated Reduced Clearance Support box

Use to support chimney with flat, vaulted, or cathedral ceiling. Certified to reduce clearances from 2" to just 1" for any portion of chimney shielded within the support's box. Note: Any exposed chimney above the support still requires minimum 2" clearances-to-combustibles. Reduced clearance allows for smaller opening & frame within ceiling. Support can also serve as the Attic Radiation Shield. Includes top collar as shown, insulation, and two-piece adjustable black finish trim. Integrated adapter accepts either single-wall or double-wall stovepipe.

Wall-Support
(UNIVERSAL)

Use to support the chimney on a vertical wall. The triangular plates allow for a 2 ¾" adjustment of the support to the vertical surface. This support can also be used as a wall support above the insulated tee or as a support for an offset elbow. Refer to chart for load bearing capacity. In shorter chimney stack applications, the Wall-Support can also be used in place of a Tee Support. Universal design works with 5", 6", 7", or 8" pipe diameters.

SIZE	5"	6"	7"	8"	10"
A	8½"	9½"	10½"	11½"	13½"
B	12"

ORDER #	50-2				X50-2

Roof Support
(UNIVERSAL)

The roof support is versatile. A universal collar allows it to fit 5", 6", 7" and 8" chimney. It is typically used to support a chimney at the roof-deck. The mounting brackets easily adjust to suit any pitch. It can also be used as a wall-support when placed upon a floor or mounted to a ceiling; or as offset support. Please refer to instructions for more details.

SIZE	5"	6"	7"	8"	10"
A	8"				
B	4"				
C	2"				
ORDER #	ST				XST

Floor Support Plate

Use to support the chimney on a slab, floor, or joist. It includes a tightening collar that locks around the chimney and is secured by self-tapping screws (included). The collar rests on a horizontal plate screwed or nailed to the floor or slab. It can also serve as an intermediate support. Refer to chart for load bearing capacity.

SIZE	5"	6"	7"	8"	10"

	ORDER # (CANADA)	6FPB	7FPB	8FPB	10FPB
	ORDER # (USA)	6FPBR	7FPBR	8FPBR	10FPBR

Storm Collar

Collar fits over flashings to help prevent water intrusion. Generous shoulder width ensures effective protection in all climates when installed as directed. **Included with all roof flashing.**

SIZE	5"	6"	7"	8"	10"
A	5"				
ORDER #	5FC	6FC	7FC	8FC	10FC

Snow Splitter
(UNIVERSAL)

Ships flat, and folds easily on the job site. Includes 8 fastening flanges (4 on each side) for mounting. Made with heavy 14 gauge galvanized steel.

SIZE	5"	6"	7"	8"
ORDER #	FSD			

Vertical Cap

A vertical cap is required to prevent precipitation from entering the chimney. Unique clamp design allows for universal fit on any chimney with either a one-inch (ASHT) or two-inch (S2100) wall thickness.
Note: Check local codes to determine if an optional spark arrester is required.

SIZE	5"	6"	7"	8"	10"
A	4 3/4"	4 3/4"	4 3/4"	4 3/4"	4 3/4"
B	12 1/4"	12 1/4"	12 1/4"	15 1/2"	15 1/2"
ORDER #	5CC	6CC	7CC	8CC	10CC

Universal Spark Arrester Band

This band is wrapped around the vertical cap. Its purpose is to help prevent burning embers from escaping. As an added benefit, it keeps birds and other small animals from entering the chimney. Mesh must be cut to suit cap. Made of Stainless Steel.

SIZE	5"	6"	7"	8"
ORDER #	PE			

Trim Collar

The optional decorative Trim Collar can be used to help provide a professional finish around the chimney when passing through a non-combustible wall.

SIZE	6"	7"	8"
Ø INTERIOR	8 1/8"	9 1/8"	10 1/8"
Ø EXTERIOR	17"	20"	20"
ORDER #	6PF	7PF	8PF

Decorative Collar
Single-Wall Stovepipe

Used in through-wall installations. Provides decorative finish with transition between chimney and single-wall stove pipe.

SIZE	5"	6"	7"	8"
A	7"	8"	9"	10"
B	5 1/8"	6 1/8"	7 1/8"	8 1/8"

C	1 3/8"	7/8"	7/8"
ORDER #	6DQDH	7DQDH	8DQDH

Finishing Cone

Use this optional part if desired to conceal 5" projection of horizontal chimney section within dwelling. Must be used in combination with flue extension.

SIZE	6"
A	12"
B	6 1/4"
C	5 1/2"
ORDER #	6PD-1

Offset Chart

Use to determine the lengths required for an installation. Determine the offset required in view of the obstacles that must be avoided. Refer to the offset/rise chart to determine the elbows required as well as the insulated lengths needed. Check the corresponding offset height dimensions.
