

NEW

Secure Temp® S-2100 Product Improvement

Insulated Tees made AFTER March 1st, 2021, will now include a Twist-Lock Tee Cap.

The new twist-lock tee cap **replaces** the old-style cap that was used in combination with the **XSMA** Adjustable Tee Support with Coupler.

This positive change is due to feedback from service technicians and chimney sweeps. The twist-lock cap is much friendlier to work with when performing routine maintenance & inspection.

Tip: Where desired, the position of the twist-lock cap can be fixed in place with a single 1/2" stainless screw.

NEW: XTI Tee shown with XTCI Twist-Lock Tee Cap

OLD: TCS Tee Cap

Note: The old-style cap can still be ordered where needed as a replacement part.

IMPORTANT:

The TCS Tee Cap is only compatible with XSMA Adjustable Tee Supports made prior to March 1, 2021. The cap fastens to the underside of the tee support.

This design for this tee support is being updated to accept the new twist-lock tee cap. The part number for the updated design is **XSMA-2**. The updated version will not be compatible with the old-style **TCS** Tee Cap.

**Updated Part: XSMA-2
Compatible with
Twist-Lock Tee Cap**

**Old Part: XSMA
Not Compatible with
Twist-Lock Tee Cap**

ACTION REQUIRED:

Please take steps now to clear-out any remaining inventory of older parts affected by these changes. This will help to minimize any potential mismatches between different versions of insulated tees, tee caps, and tee supports. Date of production is clearly noted on box labels.

Should you need clarification, please contact your Security Chimneys regional sales manager.

PARTS TO MARK FOR CLEARANCE:

**Insulated Tees made prior to March 1, 2021:
6XTI | 7XTI | 8XTI**

**Tee Supports:
6XSMA | 7XSMA | 8XSMA**

The XTI Tee when paired with a XSMA Tee Support is suited for any exterior chimney installation where the tee can be positioned on the top of the tee support.
