

316L Now Available for Secure Seal®

# Secure Seal®

Security Chimneys has developed a 316L option for the Secure Seal® line, adding another excellent stainless steel choice for highly corrosive environments. 316L has a long-proven record as a venting material and we are pleased to offer this cost effective alternative material.

**This expansion of the product offering is available for**

**Single Wall (SS)**

**Double Wall (SSD)**

**Insulated Double Wall (SSID) in sizes 3"-24"**
