

Secure Temp[®] S2100

High-Temperature Factory-Built Chimney

At Security Chimneys, we have been manufacturing chimney since 1960

That makes us one of the oldest manufacturers of venting products in North America.

The knowledge & experience gained from those early years led to the introduction of Secure Temp S2100; the most advanced chimney design of its time. In fact, it was very first residential chimney to satisfy Canada's stringent ULC-S629 standard.

When introduced in 1984, S2100's heavy-duty construction and thick insulation quickly made it a favourite in some of North America's harshest winter climates.

Here, heat is not a luxury; it is an absolute necessity. Homeowners have heavy-duty heating needs requiring a chimney that can work just as hard. That is why they choose Secure Temp S2100.

Secure Temp S2100 Features & Benefits

FEATURES	BENEFITS
Proven engineered design with inner flue and outer casing both made of sturdy, high-quality, corrosion-resistant stainless steel	<ul style="list-style-type: none"> • Long, dependable service life means this will be the last chimney your home will ever need
Free-Floating stainless inner flue	<ul style="list-style-type: none"> • Flue is fixed only to male coupler on one end leaving it free to accommodate thermal expansion & contraction • Minimizes risk of metal fatigue and associated buckling / tearing that can occur with use; especially during chimney fires
Laser-Welded Inner and Outer Seams	<ul style="list-style-type: none"> • Enhances vertical strength • Eliminates potential source of leakage • Improves product quality & consistency
Twist-Lock Assembly with End Couplers	<ul style="list-style-type: none"> • Enables quick connection of pipe lengths in seconds with just a 1/8th turn • Eliminates need for awkward locking bands • Multi-point contact between couplers combined with generous overlap adds cross-sectional strength and reliable joint connection
Heavy-Duty Ceiling Supports with Integrated Coupler & Flue Extension	<ul style="list-style-type: none"> • Factory-assembled as a single part to minimize air leakage around chimney • Reduces number of parts needed and simplifies installation
Two-inch wall thickness filled with exclusive Secura Plus insulation that will not shift or settle	<ul style="list-style-type: none"> • Acts like a heavy coat to keep the heat in and the cold out (example: S2100 6-inch diameter weighs-in at 8.9 lbs. per linear foot) • Maximizes flue-gas temperatures for faster start-ups • Results in stable, powerful draft performance with EPA Certified stoves & fireplaces including catalytic appliances • Minimizes condensation leading to lower accumulations of creosote – the fuel that feeds a chimney fire • Eliminates risk of hot-spots that can occur with entry-level chimney products • Low surface temperature on outer casing
Wide variety of insulated components and vapor-barrier friendly designs to match today's high-efficient homes	<ul style="list-style-type: none"> • Keeps heating dollars in the home instead of being lost through walls & ceilings • Taller shields to suit deeper attic insulation levels • Ability to seal around chimney minimizes potential air leakage • Reduces risk of severe condensation in cold climates • Helps to prevent water damage within exterior walls and within ceiling / roof assemblies
Universal Support Hardware	<ul style="list-style-type: none"> • Roof Brace, Roof Support, Wall Support, and Wall Band all feature universal collar that can be sized to fit any diameter of S2100 pipe
Industry's BEST Limited Lifetime Warranty	<ul style="list-style-type: none"> • Unlike most others, our warranty is TRANSFERABLE to a future owner (competitor warranties are good only to the original purchaser) • Adds value for both the homeowner and prospective homeowner

Specifications

Applications

S2100 is a double-wall, all fuel chimney system for use with wood stoves; fireplaces; and any appliances burning wood, oil, gas, or coal.

Materials and Construction

2" of Mineral Fiber insulation encased between inner and outer walls of .016" Stainless Steel.

Laser welded seam.

Clearances

2" clearance to combustibles.

Diameters

6", 7", 8"

Listings

Listed to UL 103HT and ULC S629 by Intertek.

ULC S629 and UL 103HT System

Secure Temp S2100

Security Chimney's twist-lock feature allows you to assemble S2100 quickly and precisely without the need for locking bands.

Designed for normal, continuous operation up to 1200°F (650°C) flue gas temperatures. S2100 meets the rigorous and stringent requirements of the ULC S629 standard, including one hour at 1700°F (925°C), plus three thirty minute chimney fire tests at 2100°F (1150°C).

Typical Installations

- Refer to our Typical Venting Installation drawings to select the appropriate component parts for your installation.
- In through-wall installations, a Wall Thimble and appropriate length of pipe must be used if wall is constructed or faced with combustible materials.
- Reduced Clearance Ceiling Supports feature an integrated Attic Radiation Shield. It can be used in all installations that pass through an attic, regardless of whether the attic is insulated or not. Note: For Multi-Story applications, an Attic Radiation Shield and Firestop must be used separately.
- A Firestop must be used when a chimney passes through any ceiling not protected by a factory ceiling support.

Installation Key			
1	Rain Cap	7	Length
2	Storm Collar	8	Round Finishing Support
3	Adjustable Roof Flashing	9	Insulated Tee
4	Attic Radiation Shield	10	Tee Support
5	Firestop	11	Wall Thimble
6	Wall Band	12	Twist-Lock Tee Cap (Clean-out)
		13	Reduced Clearance Support

Exterior installation to a wood stove

Multi-story Woodstove

Single-Story Woodstove

For guidance in selecting stovepipe components, see our catalogs for Ultimate StovePipe (USP) or DuraBlack single-wall stovepipe.

Offset and rise calculation

The following steps will help determine the lengths required for an installation:

1. Determine the offset required in view of the obstacles that must be avoided.
2. Refer to the "Offset/Rise Chart" to determine the elbows required as well as the insulated lengths needed.
3. Check the corresponding offset height dimensions.

ELBOW OFFSET & RISE CHART

One length between elbows							
Angle	Dia.	8"	12"	18"	24"	36"	48"

Planning Your Installation

Figure 1

The following recommendations are a general guideline to assist in the layout and selection of the chimney components needed for your installation. Always follow Security Chimney's Installation instructions when installing your chimney system (enclosed with any support). Installation instructions can be viewed online at www.securitychimneys.com.

- The diameter of the chimney should match the outlet size of the appliance. An improperly sized chimney results in poor draft and excessive creosote formation.
- Measure the diameter of the appliance flue outlet. Select the chimney and either Ultimate StovePipe (USP) or DuraBlack connector stovepipe with the same size diameter as the appliance flue outlet.
- Determine if the installation is a through-the-roof installation or a through-the-wall installation. A through-the-wall installation will require additional components (Wall Thimble, Tee/Cap, Tee Support, Wall Bands, Flue Extension, and Decorative Collar).
- Install the chimney in the interior of the structure whenever possible. A cold exterior chimney will produce less draft and will generate more creosote.
- If possible avoid offsets that serve to restrict the natural draft. A straight vertical installation is more efficient and less likely to develop creosote. If an offset is required to avoid rafters or other obstructions, measure the horizontal distance required and the vertical height available. 15°, 30° and 45° elbows are available. (Note: 45° elbows are only allowed in Canada). A maximum of two offsets (four elbows) in a single installation are permitted. At least one suitable support is required for each offset.
- Determine the minimum chimney height above the roof line. Building codes require a minimum of 3' above the roof penetration and at least 2' higher than any portion of a building within 10'. See Figure 1. The termination cap is installed above that point. If chimney is more than 5' above the roof penetration a Roof Brace is required.
- Measure the roof pitch. For example, a 6/12 pitch has a vertical rise of 6" over a horizontal distance of 12". Select the appropriate flashing.
- Determine the total length of chimney and stovepipe required for the installation. To calculate the installed length of S2100 chimney pipe, subtract 1" per joint. Subtract 1 3/8" per joint of USP, if using DuraBlack, subtract 1 1/4" for each joint. Minimum chimney height, at sea level, of straight vertical chimney, is 10' to 15' above the appliance outlet. Higher elevations, or the use of elbows or a tee, will require approximately 30% to 60% more height to provide for an adequate draft.
- Be fire safe. Maintain at least 2" clearance to combustibles. Follow local building codes and have your chimney inspected by a certified professional.

Wall Support Kit

Through-Wall Option #1: Kit includes: Insulated Wall Thimble, Tee, Twist-Lock Tee Cap, Wall Support, Wall Band, Flue Extension, and Rain Cap.

With this option, Tee can be positioned above or below Wall Support.

SIZE	6"
ORDER #	6XWSK-2

Exterior Installation Kit

Through-Wall Option #2: Kit includes: Insulated Wall Thimble, Tee, Twist-Lock Tee Cap, Tee Support with Coupler, Wall Band, Flue Extension, Rain Cap, and Spark Arrester.

With this option, Tee is positioned on top of Tee Support.

SIZE	6"
ORDER #	6XKE-2

Interior Installation Kit

Kit includes: Round Finishing Support, Adjustable Attic Radiation Shield, and Rain Cap.

SIZE	6"
ORDER #	6XKI-2

Chimney Length

Stainless steel inner and outer walls. Available in 8", 12", 18", 24", 36", 48" lengths.

SIZE	6"	7"	8"
	ORDER #	ORDER #	ORDER #
A	1"		
8"	6XL8	7XL8	8XL8
12"	6XL12	7XL12	8XL12
18"	6XL18	7XL18	8XL18
24"	6XL24	7XL24	8XL24
36"	6XL36	7XL36	8XL36
48"	6XL48	7XL48	8XL48

Adjustable Length

Used in combination with straight insulated lengths, the adjustable length makes it possible to fit a length perfectly, either vertically, horizontally, or at an angle. **IMPORTANT:** The adjustable length is not designed as a load bearing component. Its vertical installation requires an appropriate support on the section above it to bear the weight of the remaining installation.

SIZE	6"	7"	8"
A	11 1/4"	11 1/4"	11 1/4"
ORDER #	6XLA	7XLA	8XLA

15° Insulated Elbow

Allows the 15° offset of a chimney. Designed to bypass an obstacle, such as a joist. A maximum of two offsets (4 elbows) is allowed.

SIZE	6"	7"	8"
A	5/8"	5/8"	5/8"
B	4 3/4"	4 3/4"	4 3/4"
ORDER #	6XE15	7XE15	8XE15

30° Insulated Elbow

Allows the 30° offset of a chimney. Designed to bypass an obstacle, such as a joist. A maximum of two offsets (4 elbows) is allowed.

SIZE	6"	7"	8"

Twist-Lock Tee Cap

The twist-lock cap makes inspection access and servicing easy.

SIZE	6"	7"	8"
ORDER #	6XTCI	7XTCI	8XTCI

Flue Extension

Used to make the transition from insulated chimney to stovepipe in a through-the-wall installation. Refer to installation instructions for more details.

SIZE	6"	7"	8"
A	3"	3"	3"
B	5 7/8"	6 7/8"	7 7/8"
ORDER #	6XCA	7XCA	8XCA

Insulated Reduced Clearance Square Support

Use with flat, vaulted, or cathedral ceilings. Support can also double as a Attic Radiation Shield. Includes square-to-round collar shown, batt of factory insulation, and black finish trim. Integrated flue extension accepts either single-wall or double-wall stovepipe.

Note: Reduced clearance applies only to portion of chimney protected by the support box (and extension). Above, clearances-to-combustibles remain at 2".

SIZE	6"	7"	8"

ORDER #	6XSME	7XSME	8XSME

Offset/Wall Support
(UNIVERSAL)

Adjustable collar works with 6", 7", or 8" pipe. Factory-set to ensure minimum 2" clearance. Horizontal adjustment slot allows for up to 4" of clearance. Can be used as a wall support, offset support, or tee support.

SIZE	6"	7"	8"
A	10 3/8"	11 3/8"	12 3/8"
B	12"		
C	2"		
D	2"		
ORDER #	XS0-2		

Roof Support (UNIVERSAL)

Typically used to support a chimney at the roof-deck. The mounting brackets swivel to suit any pitch. Adjustable collar works with 6", 7", or 8" pipe. Can also be used as supplemental support. Refer to instructions for more details.

SIZE	6"	7"	8"
A	8"	8"	8"
B	4"	4"	4"
C	2"	2"	2"
ORDER #	XST		

Anchor Plate

Attach to the top of a fireplace or other approved appliance to enable proper connection of the chimney.

SIZE	6"	7"	8"
A	6"	7"	8"
B	14"	14"	14"
C	2"	2"	2"

Firestop

Use as per instructions to provide protection at underside of a ceiling penetration.

SIZE	6"	7"	8"
A	16"	18"	18"
B	14"	15"	16"
ORDER #	6XBF	7XBF	8XBF

Radiation Shield

Can be used as an alternative to the standard Firestop (XBF). This version includes a Radiation Shield. May be required by some appliance manufacturers.

SIZE	6"	7"	8"
A	16"	18"	18"
B	13"	14"	15"
C	10"	10"	10"
ORDER #	6XRS	7XRS	8XRS

Adjustable Insulated Attic Radiation Shield

Two-piece overlapping design adjusts from 12" up to 22" height to accommodate deeper levels of insulation. Part is factory-insulated and includes both the base plate and collar as shown.

SIZE	6"	7"	8"
A	14"	15"	16"
B	14"	15"	16"
C	16"	18"	18"
ORDER #	6XARSA	7XARSA	8XARSA

Insulated Wall Thimble

Designed to protect surrounding combustible materials when a chimney passes through a wall. Thimble works with wall thicknesses from 7" up to 12-1/2". Can be trimmed for use with thinner walls. Includes painted Decorative Collar for interior finish. Insulated to prevent heat loss or cold air intrusion.

SIZE	6"	7"	8"
A	20"	20"	20"
B	10 3/8"	11 3/8"	12 3/8"

ORDER #	6XRSMI45	7XRSMI45	8XRSMI45

Roof Brace (UNIVERSAL)

Required to stabilize chimney against wind-loading when 5 feet or more extends above the roof-line. Adjustable collar works with 6", 7", or 8" pipe. Brace arms are adjustable from 60" up to 115".

Note: Not intended to provide protection against sliding ice or snow on a metal roof.

SIZE	6"	7"	8"
A	10"	11"	12"
B	60" to 115"		
ORDER #	XBS2		

Wall Band (UNIVERSAL)

Use to provide lateral stability when chimney runs up an interior or exterior wall. Adjustable arms slide in or out to set required clearances. Adjustable collar works with 6", 7", or 8" pipe.

Note: The use of wall bands at intervals of 8' is recommended.

SIZE	6"	7"	8"

	ORDER #	6XFP	7XFP	8XFP
8/12 - 12/12	A	3 1/2"	3 1/2"	3 1/2"
	B	14"	14"	14"
	ORDER #	6XFPB	7XFPB	8XFPB

Storm Collar

Collar fits over flashings to help prevent water intrusion. Generous shoulder width ensures effective protection in all climates when installed as directed. **Included with all roof flashings.**

SIZE	6"	7"	8"
A	5"	5"	5"
ORDER #	6XFC	7XFC	8XFC

Snow Splitter

Ships flat, and folds easily on the job site. Includes 8 fastening flanges (4 on each side) for mounting. Made with heavy 14 gauge galvanized steel. Fits all diameters.

SIZE	6"	7"	8"
ORDER #	FSD		

Rain Cap

A rain cap is required to prevent precipitation from entering the chimney. Unique clamp design allows for universal fit on any chimney with either a one-inch or two-inch wall thickness.

Note: Check local codes to determine if an optional spark arrester is required.

SIZE	6"	7"	8"
A	4"	4"	4 3/4"
B	12 1/4"	12 1/4"	15 1/2"
ORDER #	6CC	7CC	8CC

Universal Spark Arrester Band

This band is wrapped around the rain cap. Its purpose is to help prevent burning embers from escaping. As an added benefit, it keeps birds and other small animals from entering the chimney. Mesh must be cut to suit cap. Made of stainless steel.

SIZE	6"	7"	8"
ORDER #	PE		

Trim Collar

The optional decorative Trim Collar can be used to help provide a professional finish around the chimney when passing through a non-combustible wall.

SIZE	6"	7"	8"
ORDER #	6XPF	7XPF	8XPF
Int.	10 1/8"	11 1/8"	12 1/8"
Ext.	21"	21"	21"

Decorative Collar
Single-Wall Stovepipe

Used in through-wall installations. Provides decorative finish with transition between chimney and single-wall stove pipe.

SIZE	6"	7"	8"
A	10"	11"	12"
B	6 1/8"	7 1/8"	8 1/8"
C	1"	1"	1"
ORDER #	6XPB	7XPB	8XPB

Finishing Cone

In through-wall installations, the finishing cone can be used in combination with a Twist-Lock Flue Extension to conceal stainless chimney that would otherwise be visible from within the dwelling. Requires 5" projection length.

SIZE	6"
A	12"
B	6 1/4"
C	5 1/2"
ORDER #	6PD-1
